## **CLAIMS**

- An instrument for evaluating supply chain performance in transport logistics including a plurality of measurement items wherein said items are divided into
   at least the dimension of service effectiveness for shippers, service effectiveness for consignees and operations efficiency for transport logistics providers.
- An instrument for evaluating supply chain performance in transport logistics
   as claimed in claim 1 wherein at least one of said service effectiveness for shippers and/or said service effectiveness for consignees is further sub-divided into reliability and responsiveness.
- An instrument for evaluating supply chain performance in transport logistics
   as claimed in claim 1 wherein said operations efficiency is further divided into cost and asset aspects.
- An instrument for evaluating supply chain performance in transport logistics as claimed in claim 1 wherein said plurality of measured items include at least
   one or more items substantially related to any of the following:
  - Fulfill promises to shippers
  - Solve shippers' problem
  - Perform services for shippers right the first
  - Provide services at the time promised to the shippers
  - Keep shippers' records accurately
  - Tell shippers exactly when services will be performed
  - Give prompt services to shippers
  - Willingness to help shippers
  - Timely response to shippers' requests
  - Reduce order management costs

- Reduce costs associated with facilities/ equipment/ manpower used in providing the services
- Reduce warehousing costs
- Reduce transportation costs
- Reduce logistics administration costs
- Improve the rate of utilization of facilities/ equipment/ manpower in providing the services
- Improve the cash to cash cycle time
- Improve net asset turns
- Fulfill promises to consignees
- Solve consignees' problems
- Perform services for consignees right the first time
- Provide services at the time promised to the consignees
- Keep consignees' records accurately
- Tell consignees exactly when services will be performed
- Give prompt services to consignees
- Willingness to help consignees

5

- Timely response to consignees' requests
- A method for evaluating supply chain performance in transport logistics comprising:
- providing an instrument for evaluating supply chain performance in transport logistics including a plurality of measurement items wherein said items are divided into at least the dimension of service effectiveness for shippers, service effectiveness for consignees and operations efficiency for transport logistics providers; and
- evaluating performance based on an evaluation of performance of said

  measurement items in said instrument.
